

DENSO

Established in December 1949, DENSO, a leading supplier of advanced automotive technology, systems and components for all the world's major automakers, operates in more than 30 countries and regions with approximately 130,000 employees.

DENSO Oxygen Sensors

Features & Benefits

Porous PTFE Filter

Allows atmospheric oxygen to enter the sensor without permitting water or engine contaminants to seep into the casing.

Robotic Laser Weld

Aluminum-Oxide Trap Layer

Keeps silicone and lead outside the ceramic element through DENSO's exclusive design, preventing damage to the platinum electrode.

Stainless Steel Housing

Resists corrosion and contamination with a rugged, watertight body.

Double Protection Cover

Maintains proper unit temperature for quicker response times and protects the ceramic element against silicone and lead poisoning.
