

HD MP GREASE

Q.A.P HEAVY DUTY MULTI-PURPOSE GREASE is capable high performance grease for all chassis, wheel bearing, pin & bushing, ball and universal joints. The versatility makes this product and ideal solution to reduce the need for multiple products and reduce the risk of misapplication.

The lithium complex thickener combined with high quality base oils and additive package provides proven performance in automotive, fleet, construction, forestry, and agricultural equipment as well as industrial applications.

Q.A.P HD MULTI-PURPOSE GREASE has excellent mechanical stability under repeated mechanical stress and shows little tendency to separate. It has good resistance to water, making it a good choice where water contamination is unavoidable. The grease is able to give top-level protection from extreme pressure (EP) load wear and damage, as well as protection from corrosion and rust. The high dropping point and excellent resistance to oxidation makes Q.A.P HD MULTI-PURPOSE GREASE a good choice for high temperature applications.

Q.A.P HD MULTI-PURPOSE GREASE meets the NLGI (National Lubricating Grease Institute) GC/LB rating. GC indicates proven shear stability, oxidation and evaporation resistance, as well as corrosion and wear resistance with frequent operating temperatures as low as -40°C and exceeding 160°C in wheel bearings. NLGI LB indicates proven performance oxidation resistance, shear stability and corrosion and wear protection in chassis applications.

Q.A.P HD MULTI-PURPOSE GREASE is available in a standard NLGI #2 for ease of application by hand, pressure gun, or from a centralized greasing system allowing for maximum flexibility in application.

For extended performance, use Q.A.P PREMIUM SYNTHETIC GREASE.

AVAILABLE SIZES

FEATURES

- Resists excessive thickening in extreme cold for ease of pumpability
- Proven Lithium Complex thickener
- Extreme Pressure (EP) additives prevent wear
- Automotive, fleet, construction, forestry, and agricultural applications
- NLGI #2 grade for multiple types of dispensers
- Meets NLGI GC/LB requirements for automotive chassis and disc brake wheel bearings

BENEFITS

- Less resistance in cold temperatures, for easier operation
- Excellent protection against extreme pressure damage, corrosion and rust
- Extends equipment life
- High heat protection

HD MP GREASE

TYPICAL PERFORMANCE RESULTS

	HD Multi-Purpose Grease
NLGI GRADE	2
CONE PENETRATION @ 25°C, WORKED 60 STROKES (D-217)	265-295
THICKENER TYPE (D-128)	Lithium Complex
DROPPING POINT (°C) (D-2265)	273
BASE OIL VISCOSITY cST @ 40°C (D-445)	235-300
COLOR	Amber
APPEARANCE	Smooth
TIMKIN OK LOAD LBS (D-2509)	50
FOUR BALL EP WELD (D-2596)	250
OPERATING TEMP RANGE °C	-15 to 232
