# TIMKEN

## Reliable. Durable. Consistent.

Timken® Tapered Roller Bearing Wheel Hub Units for Ford Super Duty Models F-250, F-350, F-450 and F-550

With Timken application and engineering expertise, comprehensive service and support, and a strong reputation for quality, we design Timken premium wheel hub units to perform even in the toughest conditions. Recommend Timken quality and expertise to help build your customers' confidence in you and grow your business.

### Trusted Timken Products and Services. Designed and Built to:

- Provide work truck owners with a trusted, hard-working component they can depend on
- Simplify installation to help enhance uptime
- Online training helps you install wheel hub units right the first time

### Performance Testing - Benchmarked for Quality

Extreme temperature testing from -100°F to 225°F ensures critical components such as seals and sensors perform to OEM specifications.

Exceeds OEM vacuum requirements for 4X4 engagement

Hub fatigue performance testing validates the hub structural fatigue performance (hub resistance to cracking).

Sensors 100% tested to help prevent comebacks.

#### 1: Premium Bearings and Seals Provide Maximum Life

2: **Stronger Performance** Custom-designed alloy steel promotes longer hub life.

3: **Simplified Installation** Precision fits between raceway and hub barrel control internal bearing clearances to help maintain proper bearing setting.

4: **Improved Fuel Efficiency** Well-engineered premium bearings have precision profiles, advanced internal geometry and enhanced surface finishes to help increase load-carrying capacity, extend bearing life and improve fuel efficiency.

5: **Enhanced Safety** Advanced Sensor Technology monitors wheel speed for Anti-lock Braking Systems (ABS). Sensors are thoroughly tested.

6: **Smoother Ride** Low runout reduces noise and vibration, improving braking performance.
