Dayco Service Hose

DAYCO® Small I.D. Molded Heater Hose
The Dayco Small I.D. Molded Heater Hose is designed to replace OEM coolant hose in applications where molded hose in small diameters (1" I.D. or smaller) is required. The molded configuration eliminates the need for multiple connections of hoses and clamps when added to Dayco's line of molded heater hose and assemblies.

DAYCO® Fuel Line Hose
Designed for use on all types of carbureted gasoline engines, the Dayco Fuel Line Hose offers excellent resistance to oil, gasoline, grease, and weather. The hose is constructed with a neoprene cover and nitrile tube for use with leaded, unleaded gasoline and diesel fuel.

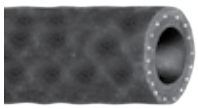

DAYCO® Fuel Injection Hose
Designed to safely and efficiently handle the higher pressure, temperatures, and chemical problems inherent in today's hotter running, fuel injected engines, the Dayco Fuel Injection Hose is constructed with a tough fluoro-elastomer, low permeation, gasohol and diesel fuel inner tube that provides exceptional resistance to alcohol blended fuels that weaken normal fuel injection hose.

DAYCO® Windshield Washer/Vacuum Tubing
Designed to replace worn windshield washer tubing, as well as general automotive vacuum applications such as retractable headlights, sensors, etc., the Dayco Windshield Washer/Vacuum Tubing has a temperature rating of -40˚F (-40˚C) to +212˚F (+100˚C). It features a flexible, long-life EPDM rubber construction that resists normal use exposure to oil, grease, and heat deterioration, and remains flexible at low temperatures.

DAYCO® DAYPERM™ Hose
This low permeation, multi-layered rubber hose is recommended as a fuel liquid or vapor carrying component for low to medium pressure (50 psi or less, not fuel injection). The Dayco Dayperm hose is ideally suited for automotive, lawn and garden, off-road and small industrial trucks and truck fleet applications.

DAYCO® DAYPERM™ II Hose
The Dayco Dayperm II Hose is a multi-layered rubber hose with low permeation recommended for carburetion applications on small engines and older carbureted vehicles using liquid fuels. This hose meets all SAE J30R14T2 requirements and is CARB and EPA compliant. This Dayperm™ II Hose is compatible with leaded, unleaded, and gasohol fuels as well as bio-diesel fuel and ethanol blended gasoline.

DAYCO® GOLD LABEL® Silicone Heater Hose
The Dayco Gold Label Silicone Heater Hose, designed for long life in heavy duty applications, is made with special silicone compounds and reinforced with one ply of braided polyester yarn. This SAE 20R3, Class A hose is highly resistant to the deteriorating effects of oil, ozone, coolants, and coolant additives. In addition to being extremely flexible, this silicone hose has the highest temperature rating, namely –40˚F (-40˚C) to +350˚F (+175˚C), and longest service life of any Dayco heater hose product.

Dayco Garage Exhaust Hose & Accessories

DAYCO® Flare-Vent® Hose
Designed to connect the vehicle's exhaust pipe to a central exhaust system or a garage door vent, the Dayco Flare-Vent Hose features an accordion-type design for added flexibility, and a flared end for connecting one length to another. No separate connectors are required.

DAYCO® Super-Vent® Hose
Designed for overhead exhaust systems where a tight bend radius is required, the Dayco Super-Vent Hose features an accordion type construction which enables it to make turns with a small bend radius. It is available in either 4" or 5" I.D.

DAYCO® Tailpipe Adapters
Designed to interface between an auto or truck tailpipe or diesel truck stack and the garage exhaust hose itself and constructed to withstand the high tailpipe temperatures of modern vehicles, a variety of shapes and sizes of Dayco Tailpipe Adaptors are available to enable an exact match for virtually every application need. The adapters feature a universal design that will mate with the appropriate connectors.

DAYCO® Universal Bell-Shaped Adapter
Available for use with 2 1/2" and 3 1/2" hose, as well as with 2" and 3" hose. Screws over 2" or into 3" hose.

DAYCO® Universal Oval Adapter
For use on twin tailpipes and oval tailpipes. Screws over 3" or into 4" hose.

DAYCO® Universal Straight Truck Adapter
Use with tailpipe adapter for trucks and threads over 3 1/2" or into 4" hose.

DAYCO® Y-Connectors
Designed for the merging of two hoses into one typically used with dual exhaust vehicles. Available for 2", 2 ½", 3" and 4" hose.

DAYCO® Door Port Fittings
Designed for service station and garage doors. Available for use with 2 ½, 3" and 4" hose.

DAYCO® Splice Connectors
Designed for joining multiple lengths of exhaust hose. Available for use with 2", 2 ½", 3" and 4" hose.

FBB0009840	Cobra DIFF 80W-90, 18.9L	Cobra DIFF 80W-90 is recommended for most auto differentials as well as transmissions where the manufacturer specifies API MT-1. Always consult your owner's manual when choosing a compatible lubricant.
FBB0008440	Cobra UTF, 18.9L	Cobra UTF (Universal Tractor Fluid) is a multi-application lubricant used to lubricate the moving parts of off-highway mobile equipment. These fluids are used to lubricate the transmissions, differentials, final drive planetary gears, wet brakes and hydraulic systems of farm tractors and construction equipment that have a common fluid reservoir calling for a combination lubricant and power transmission fluid. • Cost effective performance • Excellent field performance in a variety of tractors and equipment • Superior final drive performance • Excellent cleanliness • Superior pump wear & abrasion protection • Enhanced friction durability
FBB0010926 FBB0011226	Cobra Heavy Chain Oil, 4X3.78L Cobra Light Chain Oil, 4X3.78L	Cobra CHAIN Light and Heavy oils are designed especially for heavy-duty chain-saw use. Cobra CHAIN Light and Heavy are available in summer and winter grades. All grades are extremely tacky, which helps the oil resist drippage and throw-off, especially from high-speed chains. Cobra CHAIN Light and Heavy grades are dyed red to help chain-saw operators identify when the chain has enough lubrication.

You should always consult your Owner's Manual when selecting any lubricant product.

RUST DESTROYER

THE RUST STOPS HERE!

Primer & Rust Treatment In One Product.

Rust Destroyer® is a PATENTED primer engineered to be applied directly over rusted metal, rusted painted metal, bare metal, galvanized metal, alumium, tin and core tan steel. It converts active rust to a passive form on contact. An absorbing action in the primer film simultaneously raises the rust from the surface and envelops all converted crystals in the primer, eliminating exposure to oxygen and moisture, which will prevent further rusting. It forms a tough shield that adheres to all paints and provides a continuous protective layer.

- **Heat resistant up to 800˚F (427˚C)**
- **Apply directly over rust**
- **No sand blasting**
- **No scraping to bare metal**
- **Works with most top coat paint**
- **No washing before or after application**

RISLONE LIQUID COPPER BLOCK SEAL AND RADIATOR STOP LEAK

31109

Seals larger leaks regular stop leaks won't. One step formula permanently repairs leaks in gaskets, radiators, heater cores, intake manifolds, blocks, heads and freeze plugs. Use on cars, trucks, vans, SUV's and RV's. One "1" Step Sealer contains an antifreeze compatible sodium silicate liquid glass formula, so no draining of the cooling system is required. It will not harm the cooling system when used properly. Use with all types of antifreeze including conventional green or blue (Silicate-based) and extended life red/orange or yellow (OAT / HOAT) coolant.

RISLONE HEAD GASKET FIX

31111

The easiest solution to stop head gasket coolant leaks. No draining of the cooling system is required. This formulation contains a combination of antifreeze compatible sodium silicate sealing liquid and various size gasket sealing particles which penetrate gaps & cracks and harden to permanently stop leaks. This seals because of the extreme heat inside the combustion chamber (2760°C) that works as a catalyst to permanently harden the material to make it stronger than the actual head gasket itself. Your vehicle is a good candidate for this product if it can idle for 20 minutes without overheating or having to add coolant. Use on ALL water cooled gasoline and diesel engines. Heavy duty formula works on aluminum and cast iron heads & blocks, along with sealing all other engine cooling system leaks better than a traditional stop leak. This includes repairing head gaskets, cylinder heads, intake gaskets, cracked blocks and freeze plugs. Use with ALL types of antifreeze including conventional green or blue (Silicate-Based) and extended life red/orange or yellow (OAT/HOAT) coolant.

RISLONE COOLING SYSTEM REPAIR

In addition, Cooling System Repair contains Xtreme Cool™ which stops overheating and reduces water temperature. Works on all 4, 6, 8, and 10 cylinder vehicles and in any gasoline, turbocharged and diesel engines. . Use with ALL types and colours of antifreeze coolant and / or water. For most vehicles leaks stop instantly. For many vehicles, this is your last chance before paying an expensive repair bill or replacing the vehicle.

RISLONE ENGINE TREATMENT CONCENTRATE 34102

The product that made Rislone famous. It used to be called "a tune-up in a bottle," and was the very reason the phrase "tune-up" was invented. No joke — this is where all that started.

Fast forward to today: eating clean and healthy foods ensures that our bodies perform at their best. The cleaner we keep our system, the better it runs. This is true for our cars as well. A cleaner engine is a better-lubricated engine with less friction and wear. Our famous, award-winning Rislone Engine Treatment does just that. This product contains high quality penetrating lubrication oil, combined with protective engine additives and special cleaning agents. It's like a healthy diet for your car.

RISLONE NANOPRIME ENGINE + OIL ADDITIVE 34104

Nano Prime is Rislone's most advanced engine & oil additive ever - it's unlike anything else on the market, period. Perfect for new and older vehicles. Rislone gives the extra protection needed for today's lighter weight oils. This unique Rislone additive uses a fully-formulated GF-5/SN-rated synthetic motor oil carrier that is backwards-compatible with all vehicles. It contains a base synthetic oil to help improve mileage & performance while decreasing emissions. It is designed to work fully with all oil viscosity grades including 0W-20, 0W-30, 5W-20, 5W-30, 10W-30, 5W-40, 15W-40 and all others. This formula is enhanced with synthetic additives including Nano-tungsten and moly friction modifiers, anti-wear agents, extreme pressure additives plus Rislone's famous detergent and dispersant package.

RISLONE ENGINE REPAIR 34110

The common element between all of the engine components is the oil. Oil is the life-blood of the engine and is pumped under pressure to all the moving parts. The two main parts needing oil for lubrication are the bearings and pistons. As the engine ages and gains more miles, the oil alone can't do the job. Internally, parts don't fit as tightly as they originally did which causes noise and loss of power. Bearings wear down, seals leak, lifters tick, blow-by passes around tired rings, and power is lost. When installed, Engine Repair helps to stop and prevent these problems and will also extend the useful life of your engine. Engine oils are generally used to reduce friction between moving parts. In addition to lubricating, motor oil must cool, provide corrosion protection and be a method of removing contaminants.

RISLONE REAR MAIN SEAL REPAIR 34240

Most rear main seal leaks are caused by a combination of normal wear in the crankshaft & seal and the drying, hardening and shrinking of the main seal. Rislone Concentrated Rear Main Seal Repair restores the seal to like new condition and also contains additives to stop leaks in severely worn seals and crankshafts. Works with ALL gasoline and diesel engines using conventional, high mileage and synthetic oil.

- Rislone – World's Most Trusted Stop Leak Brand Since 1921
- Stops ALL Oil Leaks
- Seals Timing Cover, Cam Seal, Rear Main, and Other Hard to Stop Oil Leaks

Specifically designed to seal rear main leaks, but also works better than a conventional stop leak on all other leaks. This includes the timing cover seal, cam seals, O-Rings and other gaskets.

RISLONE RING SEAL SMOKE REPAIR 34416

Stops Blue Exhaust Smoke; Reduces Oil Burning; Seals Worn Pistons & Rings; Add to Engine Oil Anytime

Seeing smoke? Don't panic. Simply put your car through the Rislone Regimen to get it back to its healthy state. Our Ring Seal Smoke Repair is formulated to help stop blue exhaust smoke, reduce oil burning and prevent plug fouling caused by blow-by.

Blow-by is usually caused by gaps in internal engine parts resulting from excess wear. Rislone's Ring Seal Smoke Repair contains viscosity improvers that thicken the oil film, filling these gaps. It also provides a seal for worn pistons and rings and cushions engine parts to reduce wear and friction. In other words, it's a car lifesaver in a bottle.
